Mobile phone insurance the best cover if its stolen or damaged.

This is an essential to all the mobile phone users in terms of safety as well as peace of mind. This is "protect more for less" policy, a totally customer friendly and a cost effective approach. With increasing number of thefts, and other damage to mobile phones, or phone loss it has become necessary to opt for mobile phone insurance. This mobile phone insurance protection cover includes insurance up to £1000. It provides insurance for those mobile phones that are damaged by water, cases of theft and in case of loss (except iPhones).

Insurance misconceptions

It would surprise you how many people said "It wont happen to me" then it did, only to find that they have large expenses to buy another phone, worse still if you are on contract the network will NOT replace your phone handset , but they will still charge you the line rental. Leaving you with bills to pay and no handset. **DONT LET THIS HAPPEN TO YOU, IT SO EASILY CAN!** If your on T-Mobile, Vodafone or Virgin, Orange, O2 or any other provider we can cover it

Last year it did, to over 3 million people, and of that 1 million were damaged by water, from dropping down the toilet, to putting it in the washing machine, to falling in puddles. It can happen so easily and does but then its too late you cannot take out mobile phone insurance after the event, and this is what upsets so many people, who then regret not taking out effective mobile phone insurance cover.

How many times have you had an argument with with the wife or husband or girl/boyfriend and in the heat of the moment

the handset is smashed or damaged, you are covered for that as well. CAN YOU AFFORD NOT TO INSURE IT!
