
Fraudulent Call Cover Protection

This insurance policy has been operating for the last 10 years.

Most insurance companies cannot offer any fraudulent call cover, due to new FSA regulations. Because Insure-my-mobile is fully FSA accredited and regulated we CAN offer proper fraudulent call cover.

Other companies do offer a higher amount than £100 fraudulent call cover, BUT they often only 'cover' calls made AFTER the phone has been reported stolen to the network - which is AFTER the network will de-activate the SIM card meaning that NO fraudulent call could be made! This means that these other companies' 'fraudulent call cover' is totally meaningless.

The Insure-my-mobile 2u Insurance Fraudulent Call cover specifically states that it is for calls made once the phone is stolen BEFORE the phone is reported stolen to the network. This means that the Insure-my-mobile 2U Fraudulent Calls cover actually does protect you

This basically means that with other companies you COULD receive a bill which you would have to pay run up by a thief between the instant it was stolen until the network switched off the sim.

With our cover from the time the phone is stolen you are covered in that instant - No more worry about calls and the bill being made by the thief your covered.

How we can help!
